

# STOP THE MONSTER MAST

Residents said 'No' to a local mast – this must be respected!

Despite recent rejection of a Fulham Cross mast proposal, a developer wants to put an intrusive mast on **Dawes Rd**, opposite the Captain Cook pub, the Bedford Arms and the Aintree Estate. If approved, it will be a massive **17 metres / 55 feet** high, well above the height of existing buildings and trees.

It will be totally unsuitable for the character of our area. Several homes and schools will be within range. There has not been proper consultation – not even a Site Notice to make residents aware.

Levels of **mast radiation** elsewhere in the borough **already** peak at well above scientists' recommended limit for prolonged exposure. Residents have reported (for instance) sleep difficulties, headaches and palpitations.

This will not be good for our **health**, and especially **children**, whose bodies are not fully-formed. It will also affect our local trees and foliage, and pollinators such as bees.

Pic: A similar mast in Farm Lane; bulky cabinets not shown.

## HAVE YOUR SAY...

- To comment online, visit <https://bit.ly/3EvgR7w>

Please make sure you **at least** object to it affecting the character of the area and its trees - this will count. For more information about the proposal – tips and a **quick link for objecting by email** - visit our webpage <https://www.techsceptics.org.uk/5g/dawesrd.htm>.

- You can also post your objection to Hasna Miah, Planning Officer, Development Management. LB Hammersmith & Fulham, King Street, London W6 9JU.
- The deadline for objections is Wednesday 27 September, but please get yours in **now**. Make sure you quote planning application ref. **2023/02234/TEL56**.

## SUPPORT OUR WIDER CAMPAIGN TO MAKE H&F SAFER...

The **Say No To 5G** campaign in H&F was set up in 2019 to share awareness of emerging technology issues and stop the spread of mast radiation that's bad for us, animals and the environment. Visit [www.techsceptics.org.uk/5g](http://www.techsceptics.org.uk/5g) for more information.

We also support the important crowd-funded national legal action [actionagainst5g.org](http://actionagainst5g.org). This is holding the government to account over your well-being and safety - the appeal is still open for donations.
