

STOP THE MONSTER MAST

Residents twice said 'No' to local masts – this must be respected!

Despite heavy rejection of two unwanted mast proposals, a developer wants to put an intrusive mast on **Fulham Palace Rd**, by the bus shelter near Harbord St, the United Reformed Church and Fulham Cross Academy. If approved, it will be a massive **20 metres / 66 feet** high, well above the height of existing buildings and trees.

It will be totally unsuitable for the character of our locality including two Conservation Areas. Several homes and schools will be within range, and there has not been proper consultation.

Levels of **mast radiation** elsewhere in the borough **already** peak at well above scientists' recommended limit for prolonged exposure. Residents have reported (for instance) sleep difficulties, headaches and palpitations.

This will not be good for our **health**, and especially **children**, whose bodies are not fully-formed. It will also affect our local trees and foliage, and pollinators such as bees.

Pic: A similar mast in Farm Lane; bulky cabinets not shown.

HAVE YOUR SAY...

- To comment online, visit <https://bit.ly/3TVMOvL>

Please make sure you **at least** object to it affecting the character of a conservation area - this will count. For more information about the proposal – tips and a **quick link for objecting by email** - visit our webpage www.techsceptics.org.uk/5g/fpr.htm.

- You can also post your objection to Mwansa Tembo, Planning Officer, Development Management. LB Hammersmith & Fulham, King Street, London W6 9JU.
- The deadline for objections is Wednesday 16 November, but please get yours in **now**. Make sure you quote planning application ref. **2022/02959/TEL56**.

SUPPORT OUR WIDER CAMPAIGN TO MAKE H&F SAFER...

The **Say No To 5G** campaign in H&F was set up in 2019 to share awareness of emerging technology issues and stop the spread of mast radiation that's bad for us, animals and the environment. Visit www.techsceptics.org.uk/5g for more information.

We also support the important crowd-funded national legal action actionagainst5g.org. This is holding the government to account over your well-being and safety - the appeal is still open for donations.
