

## KEEP FULHAM CROSS SAFE

Developers want to put some 'mini-masts' onto the front of Twynholm Baptist Church near your home.

Please object by Wed 1<sup>st</sup> Sept if possible

I object to the proposed antennae, which will spoil the look of Twynholm Baptist Church. The developers have not consulted local schools and nurseries, which is bad as children are twice as badly affected by mast radiation as adults.

The proposal does not provide a safe distance calculation, with people in the church and on the pavement especially within immediate range. People in the borough near masts are reporting headaches, facial tingling, palpitations and loss of sleep.

It would be bad for the health of the local community. Mast radiation levels in the area are currently amongst the lowest – let's keep it that way.

THANK YOU AND 'GOD BLESS'...
